

What's the Scope?

- Manufacturing & supplying traction motor coils for metro trains
- Designed as per our client's specifications
- Built with H-Class Insulation for extreme durability

Before these coils hit the tracks,
they go through:

- Dimensional checks
- Overhang profile shape check
- Custom fixtures & CNC machines

How We Build These Powerhouses?

Coil Forming:

We use 3D model jaws to keep the overhang profile consistent.

Lead Bending:

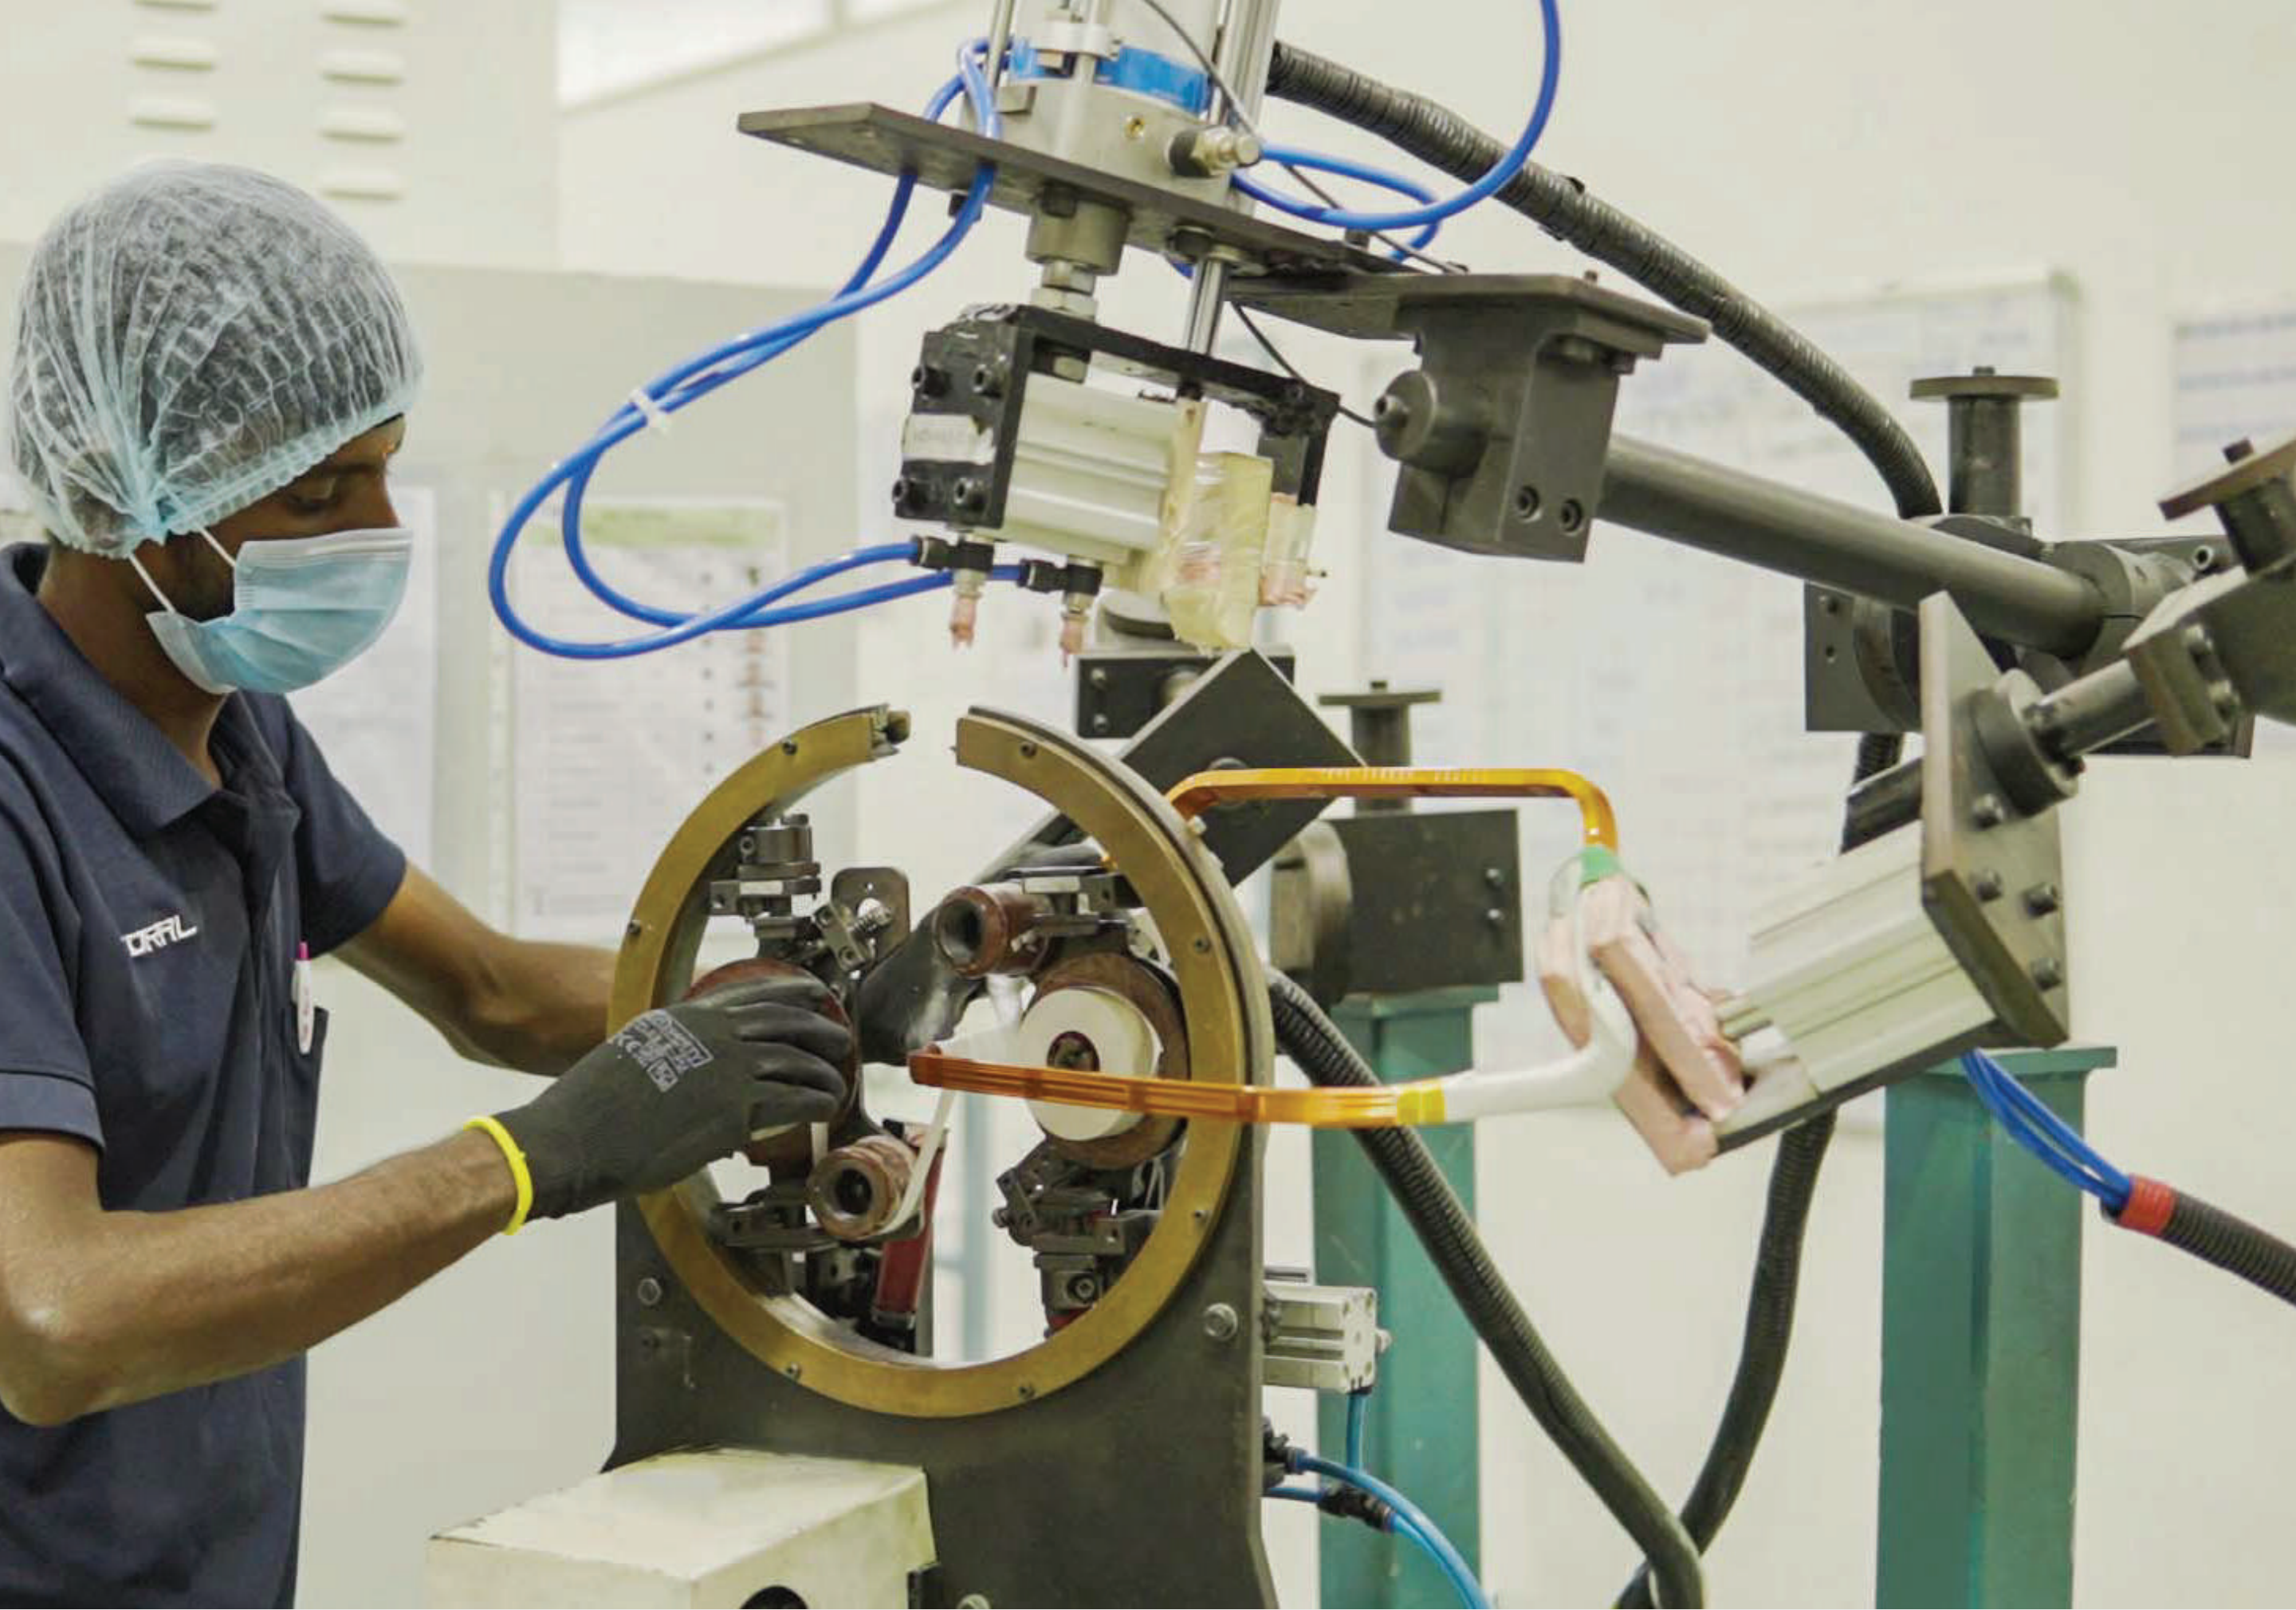

Special fixtures make sure every bend is precise.

Insulation Tapping:

3-axis CNC tapping machines for flawless insulation.

Brazing & Tinning:

Done by certified professionals, ensuring perfect connectivity.

Certified & Trusted

- ISO 9001:2015 QMS Certified
- Qualified in GPA (Generic Process Audit)

From start to finish, this project is built for performance because in the world of rail transport, reliability is everything.

CORAL

A one-stop solution for your requirements.
High quality. Best Value. Real Partners.
